

# Sustainable Procurement Policy

Barr Construction is a company operating throughout the U.K. with our head office facility based in Central Scotland. We are committed to operating our company in a responsible and ethical manner.

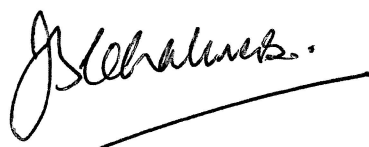

## Our sustainable procurement policy is to:

- procure goods or services that take into account the environmental, social and economic impact throughout their entire lifecycle
- purchase local products and services where possible
- comply with or exceed all applicable legal requirements
- meet or exceed the requirements of other stakeholders

## This will be achieved by:

- actively promoting environmental awareness throughout our supply chain
- encouraging partnership agreements with like minded suppliers and subcontractors who operate under a certified EMS
- including sustainability issues as part of our subcontractor procurement process
- using a quantifiable methodology to establish a product's sustainability credentials
- monitoring and reporting our progress, achievements and weaknesses
- ensuring timber products are sourced from a legal source

The responsibility for the implementation of this policy lies with the Managing Director

**Barclay Chalmers**  
Managing Director, Barr Construction
